

MailZen for Microsoft 365

YOUR OFFICE IS NOW EVERYWHERE.
KEEP YOUR EMPLOYEES MOBILE WITHOUT
COMPROMISING COMPANY DATA.

Soliton[®]

YOUR OFFICE IS NOW EVERYWHERE. KEEP YOUR EMPLOYEES MOBILE WITHOUT COMPROMISING COMPANY DATA.

MailZen for Microsoft 365 is an easy to use, secure solution, specifically designed for Microsoft 365 users. It provides employees with mobile access to online services such as editing Word files and Outlook email access - while keeping all company data secure and GDPR compliant.

Using MailZen for Microsoft 365 gives all the flexibility of Microsoft 365, plus the peace of mind of a safe working environment.

It does so by separating company data on a mobile device from private data including images, files, emails, calendar, tasks, notes and contact details. Safe in one place, MailZen makes for happy staff, happy managers and, of course, happy IT Managers.

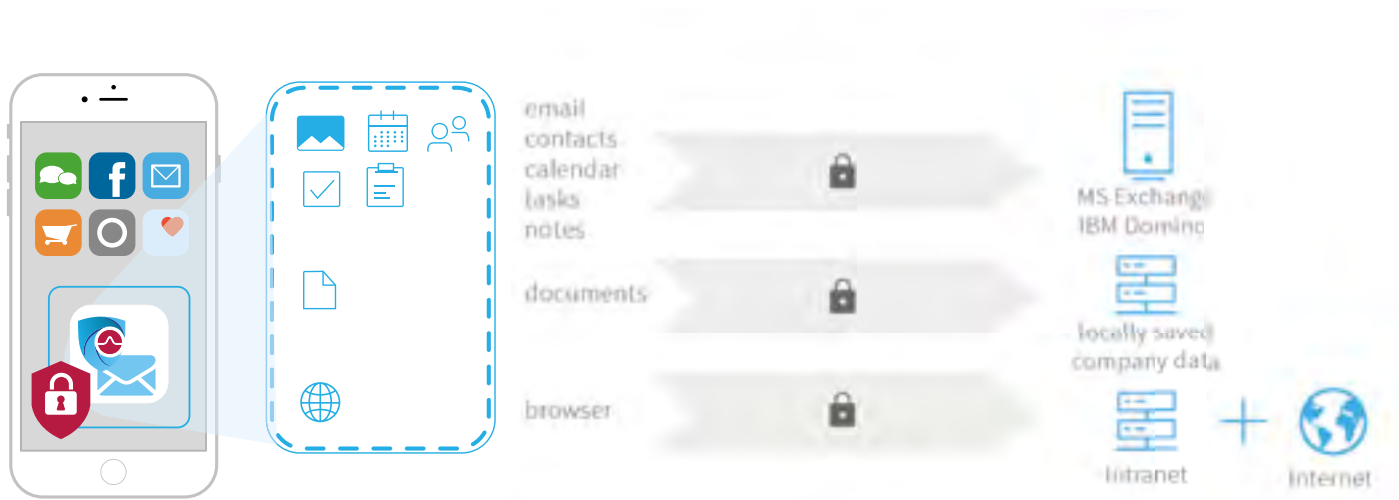

MAILZEN WHO?

MailZen is a mobile app available on both Android and iOS, which keeps company and private data completely separate. It provides employees way an easy way to access the company network on their mobile devices - without the hassle of a VPN. It's one app with everything in one place - email, contacts and calendar, as well as built-in office suite for files and attachments.

WHY USE MAILZEN FOR MICROSOFT 365?

When using the same device at work and home, it's almost impossible to stop company data and private data mixing up. But the alternatives are to force employees to carry around two devices or forbid them to use online applications, such as word, excel and OneDrive for work, on their personal devices.

MailZen for Microsoft 365 provides a secure container around all business applications, including all Microsoft 365 products by securing business data while separating it from private data.

MailZen also protects Microsoft 365 data from being accessed by the wrong people with the wrong devices. If users share their devices, other people cannot access MailZen without knowing the login credentials by fingerprint, facial recognition, pin code or password. Everything in the container is encrypted, meaning if the device is lost or stolen, there's still no problem. And, if needed, IT managers can de-activate the account with a click of a button or erase the data inside the container.

Companies can also choose to prevent employees from storing any data to a private device. So, emails and attachments can be viewed, but can't be saved.

Plus, in MailZen, apps look similar to the ones users already know, so they can get on with their day job without having to worry about learning yet another tool.

MAKE EDITS ON THE GO

Sometimes, when your co-workers receive an email with a Word, Excel or PowerPoint file, they want to make a few changes, fix typos or make suggestions.

MailZen has a built-in Office application. It's similar to Word, Excel and PowerPoint, but it's entirely inside the container. If your co-workers get an email with a Word document and want to tweak the wording, they just click the document and select edit.

As a result, users no longer need to edit in a separate app and organisations can be confident they are not losing control of valuable data in documents.

DON'T WORRY ABOUT THE DEVICE; SAFEGUARD YOUR DATA

By keeping company data separate from private data, MailZen for Microsoft 365 frees companies from the burden of managing devices. It works both with Android and Apple devices so that co-workers can use their preferred mobile device. And, instead of managing devices, you can focus on what's important: making the working lives of your co-workers more comfortable while securing company assets.

MailZen allows you to set the rules, control access and keep your corporate data safe - regardless of device.

Features & benefits

- ✓ Keep everything in one app - including your PDF, Word, Excel and PowerPoint file
- ✓ Allow access only to recognised devices and users
- ✓ Provide users with familiar interfaces, so they get up to speed, fast
- ✓ Take back control of your corporate data, without worrying about end-users' devices
- ✓ Complies with different regulations and guidelines such as GDPR.

FAST, EASY SETUP

MailZen for Microsoft 365 is fast to get setup. It doesn't require any additional Microsoft 365 licenses or other settings on either the infrastructure or the mobile device.

FREQUENTLY ASKED QUESTIONS

○ **Is there a free trial?**

Yes, there's a 30-day free trial. Even in the trial period, you have the full feature set. And, when you're ready to upgrade, you can keep the same instance, so there's no need to setup again.

○ **What happens when an employee leaves the company?**

When an employee leaves, the administrator can disable access to the service. After this has happened, the next time the employee's device connects to the management server, it can delete the data in MailZen from the devices. It doesn't affect any of the personal data on the device; it only deletes company data.

○ **Is data encrypted?**

Yes, everything inside the container is encrypted, and so is the communication between the container and the company network.

○ **Is the data monitored?**

No. Unlike some competitor products, MailZen doesn't check the content of any data, including company emails, contact information or calendars.

○ **Can you use MailZen on desktops?**

MailZen is explicitly designed for mobile and tablets. However, using Secure-Browser, you can also protect your data on both Windows and Macs.

MailZen for Microsoft 365 is beneficial for companies and employees alike. Companies keep control of their valuable data at all times. Employees can use their private devices, with the freedom to use their preferred make and model.

ABOUT SOLITON

Soliton Systems is a global pioneer of technology. Since its inception in 1979, Soliton has created a number of 'firsts' through its innovative culture as evidenced by its heavy emphasis on R&D personnel.
